

MICRO PRODUCT LAUNCH BOARD

MICRO PRODUCT LAUNCH BOARD

A compact launch planner for shipping a small digital product without a full project management system.

Price position: \$7.

Audience: creators, freelancers, newsletter writers, and solo founders who need to launch simple digital products fast.

WHAT THIS IS

The board keeps the launch small: buyer, promise, files, listing, traffic, and review. It is built for products that can ship in a day or two, not giant courses.

HOW TO USE IT

Print the PDF or open the HTML file. Fill one section at a time. Keep the first pass rough. The value comes from making a decision, not making the worksheet pretty.

OFFER

- Write the buyer in one sentence.
- Write the outcome in plain language.
- Set one free preview and one paid deliverable.

FILES

- Create PDF and ZIP versions.
- Name files clearly so buyers know what to open first.
- Add a README and support note.

LISTING

- Write Etsy, Gumroad, and Payhip copy before uploading.
- Use clear screenshots or preview pages.
- Price the first version low enough to test demand.

REVIEW

- After publishing, record views, clicks, saves, sales, and questions.
- Improve the next version based on signals, not guesses.

WORKSHEET

Use the lines below for the first pass.

- Buyer: _____
- Promise: _____
- Free preview: _____
- Paid files: _____
- Price: _____
- First platform: _____
- Traffic post: _____
- Review metric: _____

SUPPORT NOTE

This is a digital download. No physical item is shipped. If a file does not open, try the PDF first, then the HTML version in a browser.

SAFETY NOTE

This product gives organization prompts only. It does not provide legal, tax, medical, or investment advice.
